

## ACKNOWLEDGEMENTS

A number of individuals have contributed to the successful completion of this project. Cara Wise served as Principal Investigator, with Jana Keller and Christine Johnson as Field Directors. Thomas B. Ford joined the project in progress and served as lab director and assistant to Ms. Wise during the analysis and initial report preparation phases of the project. Louise B. Heite was the project historian, assisted by Robert A. Warnock. Dr. David Clark of Catholic University conducted the floral and faunal analyses, assisted by students of the University's Department of Anthropology.

Field and laboratory personnel, without whose concerted efforts this project could not have been completed, included Maria Almadovar, Lauren Archibald, David W. Babson, Pat Bartils, Ann R. Brown, Patricia J. Condell, Marilyn Cross, Mary Elizabeth Gantt, Richard L. Green, Bertram Herbert, Neil Heyden, David Hoes, Marissa A. Ianni, Desmond Kahn, Timothy Kugelman, Hunter Lesser, Jeanne Metropol, Diane Notarianni, Craig Orr, Raymond F. Page Jr., Eugene Michael Sanchez-Saavedra, Kim Savage, Steve Savage, Daniel E. Schultz, Becky Seldomridge, Ronald W. Selin, Jane Shaw, Linda L. Stoutenburg, Wilma M. Trueswell, Robert A. Warnock and Elaine Webb.

Individuals who assisted Louise B. Heite in conducting the historical research included Mary Cooke, Anne Covey, Pamela Frank, Kathy Goddard, Theresa Pfeufer, Denise Rosaio, and Tracy Soulges. Dr. Amy Friedlander rewrote sections of the historical research chapter and appendix, and filled a number of gaps in the original manuscript.

Special thanks go to Parker McMullen and his students of Conrad Junior High School in Wilmington, who assisted in the excavation phase of the project.

The staff of both the Delaware Department of Transportation and the Bureau of Archaeology and Historic Preservation offered constant support during the field, laboratory analysis and reporting phases of this project. Staff of the Department of Transportation involved with this project included Glenn B. Pusey, Project Planning Director; Joseph T. Wutka, Environmental Engineer; and Nicholas S. Blendy of the Project Planning staff. Special thanks go to the DelDOT archaeologist, Kevin Cunningham, for his assistance and continual support during the day to day workings of this project.

Daniel Griffith, Administrator of the Bureau of Archaeology and Historic Preservation, provided much support for the project, along with members of his staff, including Faye Stocum and Alice H. Guerrant.

The graphics for this project were prepared by Richard L. Green and Vince G. Macek. Dick Bryant prepared the artifact plates. The interim project report was typed by Catherine W. Carper. The draft and final report typing was done by Jo Anne B. Lowe and Regina Y. Kelly. Final report revisions were made by Sue Marchman.

A special acknowledgement is due to Mrs. John B. France who provided us with an historic photograph and history of 101 Shipley Street. This information was used to place the excavation units in the Shipley to Orange Street block.

A special acknowledgement is also due to David W. Babson. David performed a number of tasks in the final analysis of materials from the project area that made him indispensable to this project. He performed his tasks with a high degree of professionalism and dedication.

Special thanks go to Dr. Amy Friedlander, Thomas R. Wheaton, James E. Ahlberg, Sandy Steffen, and Barry D. Greenhouse of Soil Systems, Inc. Dr. Friedlander reviewed the historical research of this project; and along with Mr. Wheaton, assisted in the development of the many theoretical concepts presented in this report. Mr. Ahlberg and Mr. Greenhouse provided administrative support for this project and proved to be both understanding and responsive to the technical needs of this complex investigation. Mrs. Steffen provided important support during the final revisions of the manuscript.

As can be seen from the preceding acknowledgements, a number of people contributed to the successful completion of this project. Any shortcomings or misinterpretations in this report are, however, the sole responsibility of the report editors.
